Add 16.0 SEER A/C					\$300 residential

These tables are for space heating only. Bundled A/C rebates also require the ratepayer to be a customer of the applicable electric utility. Bundles occasionally exist for multiple furnaces, boilers, or water heaters in the same building. See utility websites for complete details and qualifications. Read all applicable forms prior to offering rebate to end-user. Many additional incentive programs exist including rebates for new construction or public institutions. TEC is not responsible for any errors.

Many other incentives exist for boilers, heat pumps, water heaters, ductless splits, chillers, commercial condensing units, DCV, BAS, VFDs, ERVs, geothermal, solar thermal, and more. Visit <http://www.tecmungo.com/wordpress/?p=587> to find more incentives available.
